

Instrumentation Products

Modular Mounting System

Product Overview

Product Overview

Schneider's Modular Mounting System (MMS) provides substantial advantages by the simplest and most effective means to install Transmitters and Gauges. The MMS series are designed to be compatible with the Shell® MESC specifications for Process Instrumentation.

MMS Main Components

- Instrument Monoflange
- Manifolds

Features

The MMS components are designed to be used with Transmitters or Gauges for general Pressure and Differential Pressure Measurements.

All components benefit from a Compact Design, reduced installation costs and less potential leak points.

- Inlet and Vent connections are supplied G 1/4 parallel threaded acc. to DIN 3852 part 2
- Suitable for Liquid and Gas Service
- Connections can be assembled with Tube Fittings
- Fully self-draining
- Up to 438 bar (6350 PSI) maximum working pressure
- Equalize and Vent Valves are equipped with an Anti-Tamper facility
- Wide choice of Manifold Configurations to suit your application

Options

- Special Design to be used with Rosemount® Coplanar™ style Pressure / Differential Pressure Transmitters
- NACE (sour gas service)
- Wide range of Exotic Materials on request
- Special Connections on request
- Choice of Accessories:
 - Mounting Brackets
 - Steam Tracing Blocks
 - Electrical Heaters
 - Single and Double Vent Purge Blocks
 - Seal Pots
 - Filling Connectors
 - Blind Flanges
 - Heaters
 - Protective Shades and Enclosures
 - Test Boxes
 - Anti-Tamper Key

Instrument Monoflange SM

Product Description

The SM Instrument Monoflange is an Isolate / Vent Gauge Block for Pressure Gauges or Transmitters using screwed connections. The gauge connection is equipped with a Swivel Gauge Adaptor which enables the easy positioning of the gauge in any direction through 360°. It is suitable for Horizontal or Vertical flange mounting and can be assembled directly to the primary isolation valve.

Rating

Maximum working pressure:
100 bar @ 38°C (LPR 150-600 lbs)
438 bar @ 38°C (HPR 900-2500 lbs)

Maximum working temperature: 200°C

Connections

Instrument:
Swivel Gauge Adaptor with 1/2 NPT and G 1/2 female threads available. It can be supplied as an Integral Syphon type.

Process:
1/2" flange acc. to ASME B16.5
Available as LPR (150-600 lbs) and HPR (900-2500 lbs) RF smooth finish

Vent:
G 1/4 Female
Can be equipped with Compression Fittings

Instrument Monoflange Type G

Instrument Monoflange Type S

Standard Monoflanges

Manifold SB

Product Description

The SB Manifold can be assembled directly to a standard Mounting Plate, eliminating the need for extra Mounting Accessories and reducing pipe work on site. The SB Manifolds can also be supplied with a wide Choice of Accessories.

Rating

Maximum working pressure: 413 bar @ 38°C

Maximum working temperature:

- 200°C for PTFE packing
- 550°C for graphite packing

Mounting Bracket SAM

Product Description

The SAM Mounting Brackets are designed to ensure a Simple and Quick Installation of Manifolds with other Accessories including the Nameplate.

There are four different types of Mounting Brackets available. The brackets are made of 316 SST and are designed to be assembled to a 2" Pipestand.

Type A is used, if a Protective Shade is required.

Product Description

The SVA Purge Blocks have two main applications:

- Purge protection of the instrument using a purge medium to keep the process away from the instrument by maintaining a higher pressure than the process medium.
- To provide a sensing medium for differential pressure instruments on level indication services.

There are two Vent Purge Blocks available, the Double Vent Purge Block SVA-D for differential pressure application and the Single Vent Purge Block SVA-S for static pressure applications.

Rating

Maximum working pressure: 413 bar @ 38°C

Maximum working temperature:

- 200°C for PTFE packing
- 550°C for graphite packing

Seal Pot SSB

Product Description

The Seal Pot SSB is used for systems requiring an open seal such as high temperature, toxic or corrosive service. The Seal Pot is used with an Immiscible Seal Fluid. The difference in density to the process media will provide a barrier in front of the Manifold and Instrument.

Rating

Maximum working pressure: 413 bar @ 38°C
Maximum working temperature: 450°C

Placement

Seal Pot is located below the Orifice plate:
A Seal Fluid with higher specific gravity than the Process Medium is to be used.

Seal Pot is located above the Orifice plate:
A Seal Fluid with lower specific gravity is to be used.

Volume

Approx. 50 cm³

Product Description

The SAS Steam Tracing Block & SAE Electrical Heating are used to provide Frost Protection and to maintain Process Temperatures given that the heaters are mounted directly to the Manifold which ensures efficient Heat Transfer to the Manifold and Transmitter Body.

Steam Heating SAS

Steam Heating is provided through a separate stainless steel Steam Block which is mounted directly to the Manifold with one stainless steel M8 Mounting Bolt.

The Connection to the Steam Line is provided by two G 1/4 Female Ports equipped with Tube Fittings.

Electrical Heating SAE

Conduction Heating with self-limiting output characteristic, supplied with cable length of 1m. Is directly mounted to the Manifold with one stainless steel M8 Mounting Bolt.

Material: Aluminium (sea water resistant)
 Size: 90 x 40 x 30mm
 Voltage: 110V – 265V
 Rating: 50W
